She reported one patient on the frequent transports list due to them going out daily for methadone treatment. She reported on the month's procedures and hospitalizations: One patient has end-stage liver cancer requiring frequent blood transfusions, one patient had an extended hospitalization with eventual surgery to remove a foreign body, and the last patient had surgical hydrocele repair. She reported on more patients on the medically complex list: One patient has hepatocellular cancer with mets to their lungs. The patient is receiving oral palliative chemo for now and is seen weekly to ensure their needs are met. Another patient has severe liver disease, is intellectually delayed, and has had a recent hospitalization for a GI bleed. This patient requires a liver transplant and is following GI monthly. Another patient had an open chest wound healing well and continues with wound care. Another patient was recently admitted, is elderly, frail, has a colostomy bag, and requires frequent IV fluids for hypotension. The last patient has severe vascular disease and a vascular wound with cellulitis. This patient required hospitalization and IV antibiotics. He reported that 87.03 percent of the population, or 255 inmates, were on medication. He reported that 65.19 percent of the population, or 197 inmates, were on psychiatric medication. For April 2022, he reported that the ADP was 393. He reported that 88.8 percent of the population, or 349 inmates, were on medication.
